Briefing of Chinese Road Transportation Safety Management of Hazardous Chemicals
Hazardous chemicals are flammable, explosive, toxic and corrosive, which have high risk of accidents during transport, like explosions, fires, poisoning, radiation etc.. So that hazardous chemicals safety management is difficult.
 Companies → 7200

 Dangerous goods transport vehicles → 130,000

 Related employees → 600,000

 Highway freight volume every year → more than 200,000,000t

- With many points, wide area, and long transport distance, the security task is increasingly heavier.
Improving the legal system
Dynamic monitoring
Emergency drills
Qualification examination
Department collaboration
Demonstration construction
Main measures
I. Developing relevant regulations and standards, and constantly improving the legal security system.

- In 2005, the Ministry of Transport issued "Administrative Provisions on Road Transportation of Dangerous " which was revised and improved several times.
II. Strengthening the relevant qualification examination and strictly controlling market access

- Guiding enterprises to improve production safety agencies, improving production safety systems, etc., and resolutely banning enterprises which do not meet the statutory conditions
II. Strengthening the relevant qualification examination and strictly controlling market access

- Implementing vocational qualification system
- Strengthening continuing education training

Driving aptitude test system of professional drivers
III. Promote networking joint control and achieving entire dynamic monitoring of “Vehicle” and "people"

◆ Establishing a national network linking control system for key vehicles that requires vehicles to install satellite positioning device, and achieving dynamic monitoring finally.

◆ Achieving dynamic monitoring of the driver's behavior by advanced "driver fatigue" early warning system.

IV. Improving interdepartmental coordination mechanisms, and forming a joint safety regulatory landscape

- At the national level, establishing a dangerous goods transport inter-ministerial joint conference system with a number of ministries involved
- Under the leadership of the local governments, the departments also improve joint enforcement mechanism continuously.
V. Improving emergency plans and strengthening emergency drills

◆ Establishing contingency plans
◆ Equipping with the necessary equipment and supplies
◆ Strengthening emergency drills
VI. Carrying out the work of creating production safety standards, and establishing long-term mechanism of production safety

- Before the end of 2013, to complete the transportation of hazardous chemicals safety and production standards evaluation work and accelerate the establishment of long-term production safety mechanism in hazardous chemicals transport enterprises.
Thanks!
